

CREWpoint Contractors offers turnkey solutions to all vital aspects of industrial manufacturing and distribution facilities throughout the United States. We bring the right CREW to you.

CREWpoint Contractors wants to be your strategic partner to improve your facility's efficiency, costs and performance. We enable our clients to profit from innovative strategies and build upon advanced manufacturing concepts. We create efficiencies through our on-going maintenance plans – CREWpoint Solutions.

Our **CREWpoint Solutions** product is attractive to large corporations with recurring maintenance needs at multiple facilities. We work closely with each facility to craft a custom maintenance plan and schedule. We then dedicate a “CREW” who, through repetition, creates efficiencies and scales those efficiencies throughout your various locations.

We believe in the American worker and the industrial cornerstone this country was built on. We believe this vital sector of American business will be what continues to drive our economy.

CREWpoint Contractors' mission is to provide the best crews in the industry – making jobs more efficient and our clients more productive. We offer a tiered pricing system based on each crew member's experience and skills, giving us the flexibility to craft crews to meet your job's specific needs.

CREWpoint Contractors is a family owned, values based company committed to the success of our clients. Our core values are based on integrity, transparency, personal accountability and the value of a hard day's work. We take pride in our family's collective heritage and expect each crew member to meet the same high standards.

CREWpoint Contractors stands behind its work, employees, and clients in the spirit of working together with a commitment to each other's success.

LET US SHOW YOU WHAT MAKES US DIFFERENT

Contact us to learn why CREWpoint Contractors is your best choice when you're in need of a CREW.

SERVICES

Utilization of Open Space – CREWpoint offers turnkey solutions to maximize underutilized space, including open air space, in the form of plant floor reconfigurations and/or floating mezzanines. Below grade pallet dispensers and overhead accumulation conveyors are examples of solutions that CREWpoint has installed to help customers maximize space.

Project Management – Most large capital projects in manufacturing facilities have multiple phases and the completion of these phases each impact the other. CREWpoint Project Managers have the tools needed to manage a project correctly from start to finish for a variety of construction jobs. Safety awareness, communication, coordination, execution, common sense and motivation are practiced daily by our CREWs and our leadership.

Robotic Cell Installations – CREWpoint is your solution for the rigging and assembly of robotic equipment. Alignment, anchoring and grout will be done with the highest level of precision and workmanship. CREWpoint can install or upgrade the necessary utilities for your new robotic cell. Foundation modifications may be required and CREWpoint has the CREW for that, too!

Equipment Demolition, Relocation and Installation – With the proper PPE and equipment, CREWpoint can successfully complete your demolition needs. Salvation and segregation of recyclable materials is practiced to help offset the removal cost of your obsolete equipment.

Conveyor Assembly and Modification – CREWpoint can modify and reconfigure existing material handling equipment so that it can continue to be utilized upon the arrival of new process equipment on the production floor. Elevation changes and transitions can all be fabricated on site.

Steel Fabrication – CREWpoint provides high caliber steel fabrication to our customers. Custom solutions are fabricated in the field to ensure all requirements are met. Access platforms, safety ladders, guard rails, fencing and transitions are examples of this.

Rigging and Relocation – CREWpoint riggers have the experience and equipment to safely move machinery within your facility or to another facility. We have invested in our riggers to help protect our customers' equipment investments.

Piping – Stainless Steel, Carbon Steel, Copper, Aluminum and Poly, Welded, Threaded, Glued and Coupled Pipe. CREWpoint pipe fitters install your piping with professionalism and consistency, with the foresight to allow for future expansion. Flow, volume, and maintenance are at the forefront when designing and installing your piping solution.

Compressed Air Systems – CREWpoint helps resolve moisture, scaling pipe, low volume and unbalanced systems issues. CREWpoint will increase volume on the production floor, install zero loss drains, new compressors, dryers, filters and receivers. Future expansion, maintenance and uninterrupted production are always considered when designing a new system or upgrading an existing system.

Millwrighting – CREWpoint millwrights read blueprints, understand hydraulics, mill maintenance, industrial math and welding. Their physical and mental skills allow them to successfully practice problem solving, keen attention to detail, analytical thinking and innovation every day.

Facility and Warehouse Maintenance and Revitalization – Constant wear and tear in warehouses and plants can quickly result in safety hazards. CREWpoint is ready to help eliminate such hazards and improve the overall appearance of your facility. Additionally, CREWpoint has the necessary skills to complete your warehouse and facility revitalization, whether you need to reconfigure an aging structure into a modern state-of-the-art facility or completely repurpose it for another use.
